# 3. The registrar's office (DSC 6.2)

Instructors instruct the course.
There are courses, each one with it's own attributes.
Students apply to the course, student have to attend the course offering in order to get a grade.

4. Classroom scheduling (DSC 6.6)

We have students who are going to attend the "Exam" and exam is determined/set
by "time" like date but usually they're only available during set schedule&time, usually there are multipleexams but when we are talking about booking rooms for the exam, it's not usual to take multiple exams at same time. so only one exam possible
during exam time, for the current course, that's the idea here.

Next comes section which is which "course" and that applies to booking a room for that specific "section" of the course.. so the question is it an online exam? is it oral exam?
